

TDRFORZA

HDPE PRESSURE PIPE

TDRPIPE

TDR™ FORZA is our high performance HDPE pressure pipe product line. Using only high quality certified and listed materials with state of the art production technology. We build a strong pipe to resist the most demanding applications.

APPLICABLE STANDARDS AND CERTIFICATIONS

- ASTM F714, ASTM F2619, PPI TR4 HSB Program Listed, NSF/ANSI/CAN 61

APPLICATIONS

- Potable Water Systems, Mining Industry, Storm and Sanitary Water Sewage, Oil and Gas Industry, Pressure Irrigation Systems, Pipe Bursting and rehabilitation Lines

PIPE CHARACTERISTICS

- TDR PE 4710 is a high performance bimodal HDPE pipe. Superior strength, corrosion, abrasion and high chemical resistance. Smooth interior wall to resist scale build up preventing flow capacity reduction. Leak-free heat fused joint system. Installed by open cut or trenchless method. Color gray for TV internal inspection available. Color stripes according to application available.

TECHNICAL DATA - PE 4710

Table with 3 columns: Physical Properties, Nominal Value* Resin in compliance to ASTM D3350, Test Method. Rows include Resin Designation, Cell Classification Limits, Density, Melt Index, and Flexural Modulus.

Table with 3 columns: Physical Properties, Nominal Value*, Test Method. Rows include Tensile Strength @ Yield, Slow Crack / Growth Resistance, Hydrostatic Design Basis, Minimum HDB, and Color and Ultraviolet Stabilization.

DIMENSIONS

Large table showing dimensions for various pipe sizes (IPS Size, Nominal OD, Min Wall) and work pressures (psi, DR).

Pressure ratings for water@ 73.4°F (23°C)

*Nominal Values are typical results and are not guaranteed or intended to be used as a product specification or engineering values. **Pressure Ratings are dependent upon temperature, environmental, and/or chemical considerations which may require the use of additional service factors.
